

U.S. ENVIRONMENTAL PROTECTION AGENCY
NOTIFICATION OF HAZARDOUS WASTE ACTIVITY

INSTRUCTIONS: If you received a preprinted label, affix it in the space at left. If any of the information on the label is incorrect, draw a line through it and supply the correct information in the appropriate section below. If the label is complete and correct, leave Items I, II, and III below blank. If you did not receive a preprinted label, complete all items. "Installation" means a single site where hazardous waste is generated, treated, stored and/or disposed of, or a transporter's principal place of business. Please refer to the INSTRUCTIONS FOR FILING NOTIFICATION before completing this form. The information requested herein is required by law (Section 3010 of the Resource Conservation and Recovery Act).

Explanation to Part IX of the Notification of
Hazardous Waste Activity Form

A well which may be plugged with coal tar or coal tar derivatives is to be investigated by a contractor to the Minnesota Pollution Control Agency (MPCA). The well was previously used for industrial purposes by the Reilly Tar and Chemical Company. Reilly Tar has rejected requests from the MPCA and EPA to clean out the well at its expense, and is currently the subject of legal actions brought by Minnesota and the United States under §7003 of RCRA (43 U.S.C. §9603), §§106-107 of CERCLA (42 U.S.C. §§9607-07), and other laws. Coal tar, creosote, phenol, and numerous other chemicals believed to be in coal tar and coal tar derivatives discharged by Reilly Tar are classified as toxic hazardous constituents in 40 C.F.R. Part 261, Appendix VIII. When the material plugging the well is removed, analysis will be performed to characterize the material. If it must be handled as a hazardous waste, demand will be made on Reilly Tar to dispose of the material in accordance with RCRA regulations. If Reilly Tar is unwilling to assume responsibility for the material, the MPCA will accept responsibility as the generator for purposes of these regulations.
